Javascript,Typescript, Sql Server, SQL Lite, Oracle, React.js.

Soft Skills: Teamwork, Decision Making, Effective Communication, Critical Thinking, Adaptability,
Leadership, Empathy.

JOB EXPERIENCE:

Instituto Pc Center

Instructor sobre Python y base de datos (Análisis de Datos):
2024

Ciudad de Panamá, Panamá

Mar. 2024 - Actual

- I implemented relevant tools and technologies, such as SQLite and Tkinter, to teach students how to build applications and manage databases effectively.
- I guided students in completing practical projects using Python and databases, encouraging applied learning and problem solving in a real-world environment.
- Progress Assessment and Feedback: I developed and administered regular assessments to measure student progress, providing constructive feedback to improve their understanding and skills.
- Support and Mentoring: I provided individualized mentoring and ongoing support to students, helping them overcome obstacles and achieve their learning goals.
- Implementation of Practical Projects: Guided students in completing practical projects using Python and databases, encouraging applied learning and problem solving in a real-world environment.

Universidad Tecnológica de Panamá

Ciudad de Panamá, Panamá

Mar. 2023 – Actual

- I learned to design, code, test, and debug software programs, following industry best practices and using tools such as IDEs, version control systems, and collaboration platforms.
- I learned to design, code, test, and debug software programs, following industry best practices and using tools such as IDEs, version control systems, and collaboration platforms.
- I worked in multidisciplinary teams to complete software projects, improving my communication and collaboration skills in an academic environment.
